ALL THE HUES AND COLORS OF THE RAINBOW.

MOST BEAUTIFUL FLOWERING SUMMER BULBS

The Gladiolus, with its beautiful flowers clustered on tall spikes which are two feet or more in height, and often several from the same root, is the most attractive of all the summer flowering bulbs, and deserves a place in every garden or lawn, as they are sure to flower and do well with very little care, and have no insect enemies or diseases.

The flowers are of almost every desirable color—brilliant scarlet, crimson, creamy-white, striped, blotched and spotted in the most curious manner.

We have been experimenting for years with Gladiolus to obtain most distinct and showy varieties, and now have an assortment of these beautiful and popular summer flowering bulbs that is unrivaled for brilliancy and variegation of coloring, strength and vigor of growth, flowers of exceptionally large size, and distinctive and attractive appearance. We claim to have the best on the market.

## CULTURAL DIRECTIONS

Set the bulbs from six to nine inches apart and about four to five inches deep. Plant as soon as the earth is in a mellow condition, usually from the middle of April to first of June. In the fall, before hard frost, take up the bulbs, remove the tops and leave to dry in the air for a few days, and store in some cool place secure from frost until spring. When these *bulbs are delivered in the fall*, keep in a cool cellar with temperature just above freezing point, and plant in the spring as directed above.
